

# MOBILE TESTING SERVICES

## Mobile Testing Services

### What we offer?

- A complete system breakdown, detailing your system's structure and how we plan to test it.
- A comprehensive defect report exhibits the details about each bug, its severity, location, mobile platform it was found on and much more
- On-going support is provided from a iPrimitus senior test specialist to improve quality and incite continuous improvement.

iPrimitus also offers automated mobile testing services, designed with a holistic approach to provide test automation coverage on all major devices and platforms.

With increased application testing, inefficiencies can become more evident and problematic. iPrimitus Test Maturity Assessment and Improvement service provides insight into your testing maturity, industry benchmarking and a roadmap to more efficient testing.
